

Maxwell Mohammadi

(925) 876 1159 | maxwell.mohammadi@gmail.com | maxmohammadi.com | github.com/maxmoneycash | linkedin.com/in/maxwellmohammadi

Full-stack software engineer (TypeScript, React, Next.js) building payments and creator-payout products — shipped two Whop-integrated apps: whop.finance and contentrewards.xyz.

Projects

Content Rewards, Onchain | contentrewards.xyz

- Built **contentrewards.xyz** — live automated pay-per-view creator payouts, **payments powered by Whop**: brands fund campaigns at \$0.15–\$2.00 CPM, clippers submit YouTube/TikTok/Instagram clips, and **USDT streams to their Aptos wallets as views accumulate**, no manual approval.
- Move payment-streaming contracts, a Next.js oracle verifying views via the **YouTube Data API**, evidence on **Shelby**, and trust scoring for bot protection; authored the PropWhop whitepaper behind the streaming design.

Whop Finance: Agent Banking on Aptos | whop.finance

- Built an AI agent banking demo with **Whop integration** — agents open accounts and send, save, swap, and borrow end-to-end on Aptos testnet through an SDK, CLI, and **x402 payment** packages.
- Implemented savings and credit on **Aave V3**, DEX aggregation via **Panora**, and **Tether WDK** payment flows across checking, savings, credit, and exchange accounts.

commits.sh: Live Developer & AI-Usage Telemetry | commits.sh

- Turns any GitHub account's activity into a calibrated dev rank and live velocity index — public REST API, **MCP server**, CLI, and embeddable live SVG badges.
- Streams real time token telemetry from **8 coding agents** — **67B+ tokens tracked** with per-model cost and burn dashboards.

MaxXP: Windows XP Desktop Portfolio | maxmohammadi.com

- Pixel-faithful Windows XP desktop in React — animated Bliss wallpaper with parallax cloud layers, draggable Luna windows, a reels-style demo feed, and a live Task Manager streaming real dev telemetry.
- Period-correct detail throughout: Luna scrollbars with working arrow buttons, tray balloons with system sounds, working menu bars and tooltips — transform/opacity-only motion with reduced-motion support.

Experience

Aptos Labs

January 2026 – May 2026

Independent Software Engineer, In Residence

Palo Alto, CA

- Built Polymarket and Whop demos to pitch Aptos rails for prediction markets, trading, payments, and investing.
- Shipped LLM MCP servers for **Decibel Trade** and **Shelby Protocol**, exposing protocol workflows to agent driven tooling.
- Wrote a prediction market Move contract from scratch, then profiled transaction paths, storage access, and execution bottlenecks with Aptos founding engineers until benchmark throughput reached **10k TPS**.
- Built automated Decibel trading bots that convert **TradingView PineScript** indicators into onchain trading strategies.

Ernst & Young, EY Blockchain

September 2024 – September 2025

Blockchain Security Consultant

San Francisco Bay Area

- Audited enterprise crypto custody infrastructure alongside **Trail of Bits** — transaction orchestration codebases, cold storage signing workflows, and HSM integrations.
- Led crypto incident response with **TRM Labs**, tracing onchain fund flows and performing forensic analysis of transaction anomalies.

Ernst & Young

June 2021 – September 2021

Forensic Data Analyst (Intern)

San Francisco Bay Area

- Implemented anomaly detection for forensic data analysis, identifying cases of fraudulent financial activity; researched Ethereum and Celo protocols for client product research.

Sydereal

December 2020 – October 2021

Software Engineering Intern (Part-Time, during school year)

San Francisco Bay Area

- Migrated satellite telemetry from SQLite to InfluxDB (20% faster processing); implemented neural network anomaly detection for spacecraft telemetry, saving about \$150K.

Proximai AI

May 2020 – June 2021

AI Research Intern (Part-Time, during school year)

San Francisco Bay Area

- Prepared three advanced technology proposals to NASA Innovative Advanced Concepts; contributed to RaDAR, a spatial temporal framework for aircraft GO/NO GO decisions.

Education

California Polytechnic State University, San Luis Obispo

September 2018 – June 2023

B.S. Computer Science | 3.6 GPA | President, Cal Poly Blockchain

Volunteering

Junior Achievement of Northern California

2016 – Present

Classroom Volunteer

SF East Bay & South Bay

- Volunteering with JA since high school; for the past three years taught the **JA crypto curriculum** across a dozen classroom sessions at Bay Area high schools, in **Circle's** scholarship partnership with JA.

Technical Skills

Languages: TypeScript, Move, Rust, Solidity, Python

Payments & Fintech: Tether WDK, x402 payments, Aave V3, Panora, creator payouts, Aptos TypeScript SDK, Move smart contracts

Web, Data & Infra: React, Next.js, Node.js, Vite, Redis, InfluxDB, SQLite, WebSockets, Tailwind CSS, Framer Motion, Vitest, Playwright, Vercel, GitHub Actions

AI & LLMs: OpenAI & Anthropic (Claude) APIs, LangChain, RAG, MCP, AI Agents & Function Calling, Structured Outputs (Zod)
